REASONS FOR ALLOWANCE

The following is the examiner's statement of reasons for allowance:

Independent claims 40, 48, and 56, among other things, teach: generating a permanent record of a service provided to a user at a location of a mobile device by receiving a request and information identifying a particular printer where the record is to be printed, processing the request by generating data for printout of the permanent record; the data comprising a digital image comprising pixels; transmitting the generated data to the print server where the print server is to modify the data for printout based on the characteristics of the specific printer and transmit the modified data for the printout to the mobile device of the server, wherein the modification of the data comprises an adaptive halftone method; wherein the modification of the data comprises utilizing an adaptive halftone method; the data for the printout of the permanent record comprises a digital image, wherein each pixel is represented by an input value, and wherein the modification of the data for the printout of the permanent record comprises: filtering the data to generate a filtered value for each pixel; obtaining the difference between the filtered value of each pixel and the input value of each pixel; determining a threshold based on the obtained differences; and generating an output value for each pixel based on the threshold and the input value of each pixel across a computer networking environment.

The prior art does not teach the cited limitation.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
